

Aranda 2002

February 19 - February 28; 2002

Tromsø - Tromsø

Chief scientist: Dr.Jürgen Holfort

Cruise report

Due to bad weather around 75N 0W no work whatever was possible. We just collected 2 CTD stations at the beginning of the cruise. During the bad weather also the main CTD broke down (a new one by just standing around) and could not be repaired on board.
